Forage Treatment For Quality Silage Production

Dyna-Sile is an advanced silage additive for the quality production of alfalfa and grass silages. Dyna-Sile accelerates the production of lactic acid producing bacteria present in the silage mass which promotes: Longer Bunk Life, Higher Fermentation Acids, Conserved Feed Energy, Preserved Nutrient Value, Reduced Excessive Heating, and Enhanced Palatability.

Ingredients

Liquid Lactobacillus Acidophilus Fermentation Product

Directions For Use

Apply 2 ounces of Dyna-Sile per ton of alfalfa or grass silage. Apply 1.5 ounces of Dyna-Sile per ton for corn silage. Apply evenly throughout the silage mass during chop-ping or packing. For optimum silage production, check KeyAg's Dyna-Sile Brochure for program details such as crop maturity, type of storage method used and environmental conditions. The ideal moisture levels for ensiling with Dyna-Sile are from 62-72%. For tough ensiling conditions apply 4 ounces of Dyna-Sile per ton of alfalfa, corn or grass silage. For special applications, contact your local Dyna-Sile sales specialist. Note: Clean sprayer system after each use.

Caution: This product can be irritating to eyes. In case of eye contact, immediately flush with water for at least 10 minutes.

Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on the label when used in accordance with directions under normal conditions of use, but neither this warranty, nor any other warranty of fitness of a particular product expressed or implied extends to the use of this product contrary to label instructions or under abnormal conditions or under conditions not reasonably foreseeable to the seller, and buyer assumes the risk of any such use. The seller shall not be responsible for incidental or consequential damages, if any, resulting from a breach of warranty.

Shake Well Before Use
