Prebiotic Supplement

Prebiotic Supplement

Excell™ is a dietary supplement comprised of non-viable lactobacillus cells, bioactive metabolites and fermentation by-products produced by a proprietary process.

Excell™ is also fortified with vitamins and minerals.

- *Is not a drug, requires no withdrawal period*
- *Needs no refrigeration*
- *Can be used with antibiotics and other medicated feed programs*
- *Can be fed free choice*

Balancing the Gut

The unique profile of cell metabolites and organic compounds in **Excell™** provides both ruminant and monogastric animals a nutritive source that stimulates and helps balance gut digestion.

Treatment	Total Rumen Bacteria Rumen Fluid (x 10 10/ml)
Control	2.33
Excell @15 cc/day	6.84
Excell @20 cc/day	14.52

Microbial Growth Stimulant

Excell™ helps to populate, restore and maintain a healthy population of indigenous intestinal microflora in the digestive system of all animals. Results and research show that an increased level of gut microflora can have positive health and production related responses.
