Derived from: Boric acid, cobalt sulfate, copper EDTA, manganese EDTA, zinc EDTA, sodium molybdate

WARNING: This fertilizer contains boron. Its use on any crops or under any conditions other than those recommended may result in serious injury to the crops.

CAUTION: The application of fertilizing materials containing molybdenum may result in forage crops containing levels of molybdenum which are toxic to ruminant animals.

PRODUCT INFORMATION: Micro Ag is a micronutrient package intended for the prevention and/or correction of boron, copper, manganese, molybdenum and zinc deficiencies. It can be applied alone or in combination with compatible agriculture chemicals or liquid fertilizers.

DIRECTIONS FOR USE: Use in accordance with recommendations of a qualified individual/institution. Do not allow to freeze. Always jar test for compatibility.

Soil Application: Apply 2x2 or at sidedress or topdress. Do not apply directly on the seed in saline, alkali, or coarse textured soils.

Foliar Application: Fill spray tank with water prior to adding fertilizer or other products. Use only as a supplement to a regular nutrient management program. Repeat applications may be beneficial. Use only as directed to avoid foliar burn. Do not apply when crop is excessively stressed for moisture during periods of high temperatures. Use of a surfactant may enhance leaf coverage and increase nutrient absorption.

RECOMMENDED RATES: This product should be used on the basis of a soil and/or tissue analysis. Suggested application rates are for one growing season (gallons per acre) in the absence of soil and/or tissue analysis.
