VEGETABLE CROPS: Apply 1-4 pints per acre (1.5-5 liters/hectare) at about 2 - 4 weeks after emergence, or when deficiency symptoms appear. Repeat the application in 1-3 weeks if necessary.

For best results, apply when the crop is in active growing stage, after irrigation or natural rain fall. For foliar application, it should be diluted with at least 100 times of water. **BIOMIN ZINC** will lower high pH of water and decrease the hydrolysis of most pesticides.

BIOMIN ZINC can be applied to strawberry, lettuce, tomato, celery, grapes, stone fruits, tree fruits, vegetables, commercial turf, and ornamental gardens.
